

Get more from the Microsoft tools you already pay for.

Most organisations already license Power Apps, Power Automate and Power BI through Microsoft 365, but very few use them to full capacity. Acqua turns **manual, spreadsheet driven processes** into automated workflows, simple apps and live reporting, built **inside your own Microsoft tenant**.

Power Apps

Business apps that replace paper forms and spreadsheets

Power Automate

Workflows, approvals and system integration

Power BI

Live dashboards from team KPIs to the board

SharePoint · Teams

Data and documents where people already work

Does this sound familiar?

- Key processes live in spreadsheets that get emailed around
- Approvals happen by chasing people over email
- Monthly reports are built by hand and out of date on arrival
- You pay for Microsoft 365 but mostly use Outlook and Excel

What you get

- ✓ Solutions built on licences you already own
- ✓ Everything stays inside your Microsoft tenant
- ✓ Your security and data policies respected
- ✓ Enterprise experience from the energy sector

IN PRACTICE · ILLUSTRATIVE EXAMPLES

POWER APPS · POWER AUTOMATE

Site and field inspections

TODAY	Paper checklists are photographed, emailed and re-typed into a spreadsheet.
WITH ACQUA	A tablet app captures results, photos and sign off, and failed items trigger follow up actions.

POWER AUTOMATE · TEAMS

Purchase and expense approvals

TODAY	Requests arrive by email and nobody can see what is pending or stuck.
WITH ACQUA	One form routes to the right approver in Teams or Outlook, with reminders and an audit trail.

POWER BI

Operational and board reporting

TODAY	Reports are compiled by hand from several spreadsheets every month.
WITH ACQUA	Live dashboards connected to your data, refreshed automatically and shared securely.

POWER APPS · SHAREPOINT

Onboarding and request tracking

TODAY	A shared spreadsheet that several people edit and nobody fully trusts.
WITH ACQUA	One app with automatic task assignment across HR, IT and facilities.

HOW WE ENGAGE

STEP 01

Microsoft 365 Review

We map your licences and processes, then prioritise the work that is ready to automate.

STEP 02

Build and Automate

Apps, flows and dashboards built in your tenant and integrated with your systems.

STEP 03

Adopt and Support

Training, documentation and governance, with ongoing support once you are live.

Craig Leith

LEAD ADVISOR · POWER PLATFORM PRACTICE LEAD

First Class Computer Science graduate delivering Power Apps, Power Automate and Power BI solutions every day in the energy technology sector.

Find out what your licences *could be doing*.

Start with a Microsoft 365 utilisation review. We will show you where Power Platform can save the most time.
